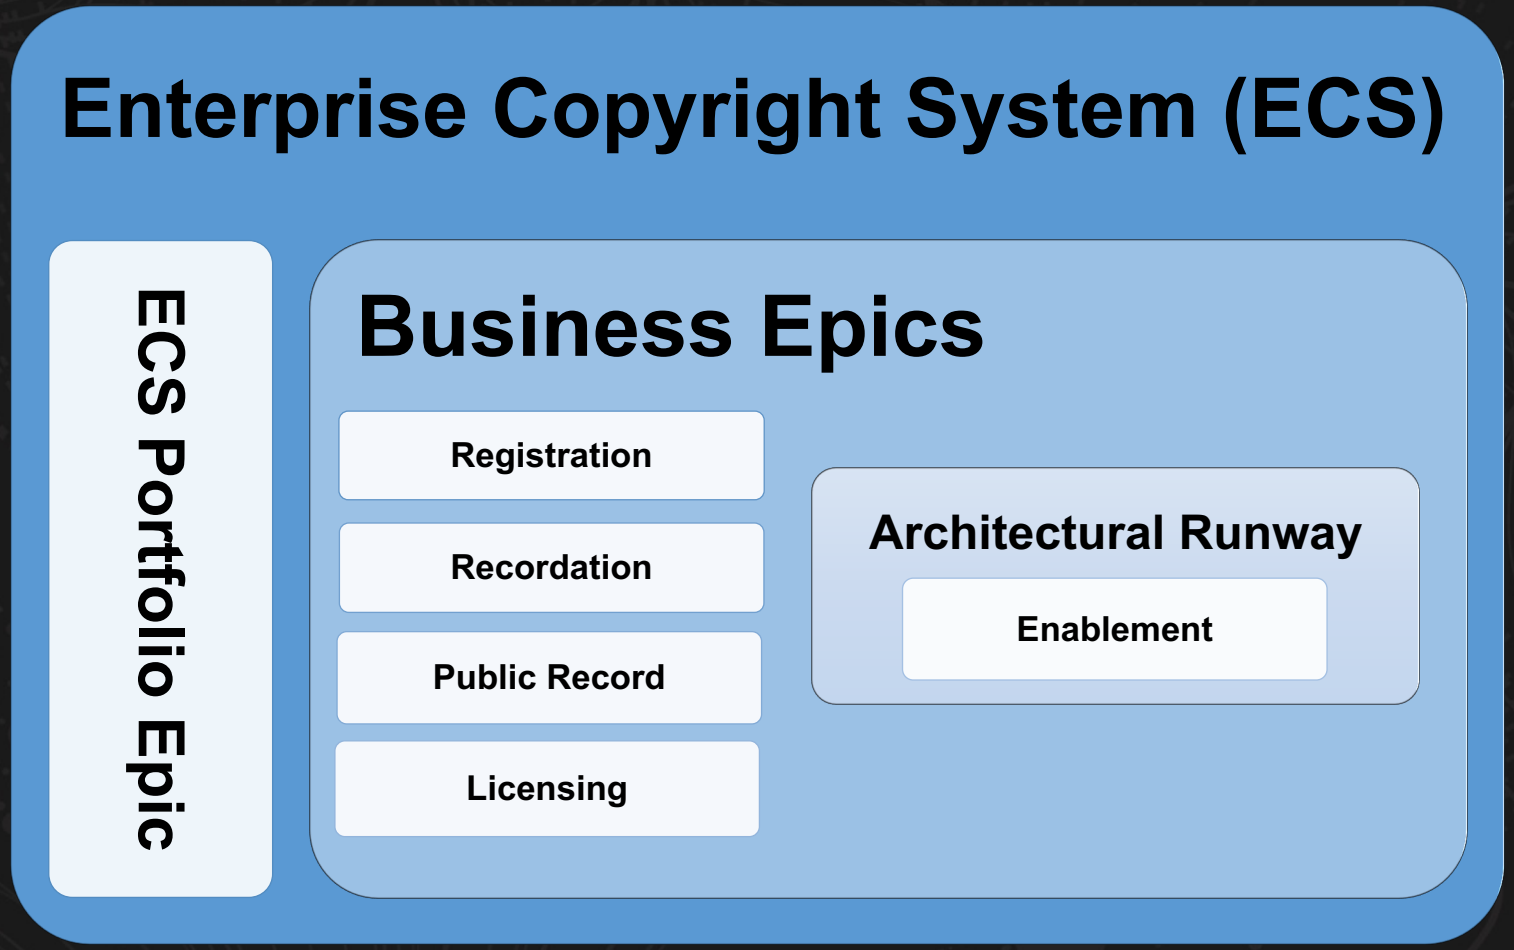
EPICS, FEATURES, AND USER STORIES



Epics are the “big picture” or largest container of a project’s scope.

Epics contain multiple features and user stories.

Features are pieces of functionality that fulfill a particular need.

User stories are portions of features written from the end-user perspective.

WHY SAFe?

- Advocates early delivery, collaboration, continual improvement, and flexible responses to change
- Facilitates organization-wide holistic management of large-scale application development efforts
- Focuses on cross-team communications, prioritization, and transparency

Forward thinking, planning, and coordination are major SAFe benefits!
